

# New Aerosol Services for your Product Development

**ACTARMO** is a Contract Research Organization (CRO) specialized in respiratory products. We partner with pharmaceutical, biopharmaceutical, and device companies, offering expert support in portfolio and regulatory strategy, MDR consultancy, pharmaceutical development, and analytical services, all the way to regulatory approval.

We're on the looking for a

## Senior Scientist (m/f/d)

Join our team! As a Senior Scientist, you will help us to strengthen our medical cannabis strategy by supporting the development of our inhalable cannabis product. Enjoy a supportive team and exciting projects.

### Your Responsibilities:

- Development, improvement, and validation of the analytical methods according to the relevant ICH guidelines (HPLC methods, inhalation-specific methods, and laser diffraction methods for determining the particle size distribution)
- Analysis of stability samples from ongoing development - or GMP stability studies
- Planning and organization of inhalation-specific analyses of cannabis products, like assay, purity, the aerodynamic particle size distribution, or the delivered dose uniformity
- Professional execution, and GMP-compliant documentation of the activities in the laboratory
- You will be actively involved in the development of medical cannabis inhalation products
- You will support the team in case of questions from clients or authorities concerning test methods, performed investigations, and validation activities
- Support the team with the qualification of analytical equipment in the laboratory

### Your Profile:

- Expertise with the analysis of herbal cannabis extracts and products e.g. by HPLC-UV
- Experience in analytics, pharmaceutical testing or manufacturing, and quality control within a GMP environment
- Experience in instrumental analyses and wet chemical methods, such as HPLC, photometry, and titration
- You have good English skills, and you are firm with common Microsoft Office applications (Microsoft Word, Excel, Powerpoint) and with common HPLC software, e.g. Chromeleon
- Ideally you have experience with the determination of the particle size distribution by laser diffraction
- You prefer a pragmatic, solution-orientated work-style, and you enjoy to work in a small team
- Experience with handling of narcotics in an analytical laboratory, with the German medicinal cannabis law and familiarity with GMP, ICH, EMA, and FDA guidelines for inhalation drug product testing and approval is a plus

We're excited to receive your application! We make hiring decisions based on qualifications, without regard to gender, ethnicity, religion, or age.
